Re: **Halal Statement**

Zochem's French Process zinc oxide is produced entirely from inorganic mineral sources and contains no organic, animal, plant, haram (prohibited), or mashbooh (doubtful) ingredients. The manufacturing process involves no use of animal-derived substances, alcohol, or any other materials that are considered non-halal under Islamic dietary law. As such, Zochem zinc oxide is inherently halal and meets the dietary requirements for halal products.

Additionally, according to international guidelines, zinc oxide derived from inorganic mineral sources is generally recognized as halal and may even be exempt from mandatory halal certification.

We are pleased to assist customers with their halal certification process by completing any detailed ingredient questionnaires or forms that may be required to verify halal compliance of our zinc oxide.

Please contact your commercial representative, customer service, or the Zochem technical department representative(s) below for any further questions.
