Natural Substance Statement

February 16, 2026

Dear Valued Customer,

Zinc oxide (ZnO) is manufactured from zinc metal, which is a naturally occurring substance found in the form of an ore. ZnO is made by melting, evaporating and reacting zinc metal in the presence of oxygen in the air. No flavorings, colorings and chemical preservatives are added to zinc oxide at any stage of the production process. As such 21CFR101.22 (Foods; labeling of spices, flavorings, colorings and chemical preservatives) does not apply to this substance.

If you have any questions or concerns, please feel free to contact me.

Sincerely,

Phil Schulte
