REACH-SVHC STATEMENT

Product: Zinc Oxide

CAS # 1314-13-2

EINECS # 215-222-5

February 4, 2026

Dear Customer,

The Regulation (EC) No. 1907/2006, also known as REACH (Registration, Evaluation, Authorization and Restriction of Chemicals), is an European Union Regulation entered into force in June 2007. This Regulation relates to the production and use of chemical substances, and their potential impacts on both human health and environment.

The REACH requires all companies manufacturing or importing chemical substances into the European Union in quantities of one tonne or more per year to register these substances with the European Chemicals Agency (ECHA) with different dead-lines depending on the tonnage band and hazards of the substances.

Zochem committed to complying with REACH obligations, registered zinc oxide in accordance with the above mentioned regulation. Kindly refer to the REACH certificate attached.

Annex XIV, also known as the Authorisation List, is a process which aims to ensure that substances of very high concern (SVHCs) are progressively replaced by less dangerous substances or technologies where technically and economically feasible alternatives are available. We have reviewed the latest Restriction List of substances and declares that the zinc oxide we manufacture does not contain any substances published in Annex XIV.

Zinc oxide does not meet the reporting requirements for any of the substances listed on the REACH SVHC list which was last updated on Feb. 4, 2026. It does not contain any of the substances listed at weight of more than 0.1%.

Best Regards,

Khalid Abdullah
IMS Manager
