Re: **RoHS 3 and WEEE Compliance Statement for Zochem's Zinc Oxide**

This is to certify that all Zochem's zinc oxide products comply with Waste from Electric and Electronic Equipment (WEEE) Restriction of the use of certain Hazardous Substances (RoHS) levels.

RoHS limits applicable to our zinc oxide product as follows:

Cadmium (Cd)	<0.01%
Mercury (Hg)	<0.1%
Lead (Pb)	<0.1%
Polybrominated Biphenyls (PBB)	<0.1%
Polybrominated Diphenyl Ethers (PBDE)	<0.1%
Phthalates (DEHP, BBP, DBP & DIBP)	<0.1%
Hexavalent Chromium (Cr6, +)	<0.1%

Of note, PBB, PBDE & phthalates decompose between 250°C to 330°C and they can not withstand our production process temperatures which typically exceed 1100°C. Additionally, while Pb & Cd are tested for each lot of finished product, we periodically (every 3-5 years) send samples of finished product for RoHS 3 analysis to an external certified laboratory. A recent example of such test report is attached below. Finally, based on the knowledge of our raw materials and production process, there is Cr6+ present in the finished product.

Please contact your commercial representative, customer service, or the Zochem technical department representative(s) below for any further questions.
